APPROVAL CERTIFICATE
AERO-GUIDANCE MK 6(T) SYNTHETIC TRAINER SYSTEM

This is to certify that the Aero-Guidance Mark 6(T) Synthetic Trainer system, being a computer-based software system produced by Kinetic Technologies International Pty Ltd of 1 Kembla Street Cheltenham East VIC 3192, having been assessed as complying with the required specifications, equipment, handling and operating requirements, has now been designated as an approved Category B synthetic trainer system for the purpose of:

- (a) conducting instrument flight training,
- (b) accruing instrument ground time, and
- (c) for satisfying recent experience requirements.

The system is not approved for the conducting of ab initio flight training.

This certificate remains valid for the Mark 6(T) software program currently approved by the Authority and for any changes subsequently approved by the Authority.

The conditions relating to the use of the trainer for instrument flight training and to instrument rating credits available under this approval are as set out in the relevant Civil Aviation Regulations or Civil Aviation Orders.
